

CONVOY OF HOPE®

COMMUNITY TRANSFORMATION

Helping communities thrive.

Since Convoy of Hope was established, we've brought help and hope to hurting people in countries all over the world. We currently partner with communities by empowering women, feeding kids, and helping farmers yield larger crops. Our global network strengthens our ability to respond quickly to disasters, extreme poverty, and hunger.

Integrated Programming Model

Convoy of Hope strives to leverage integrated programming to help communities escape the cycle of poverty and begin to thrive. Using integrated programming means we don't just use one type of intervention. We see our participants as individuals with a unique set of physical, emotional, and economic needs that must be understood and addressed holistically.

We use a multifaceted approach, partnering with the local church and community leaders to address risk, vulnerabilities, and needs. This approach is critical to supporting communities as they become more resilient and self-sufficient. We address underlying causes of vulnerability in order to see long-term transformation.

What is a thriving, resilient community?

Our mission is always to help a community thrive and become more resilient. What does this look like on the ground? A thriving, resilient community ...

1. Has the ability to assess, manage, and monitor its risks.
2. Can learn new skills and build on past experiences.
3. Has strong agricultural, feeding, and water and sanitation systems that the community can maintain, repair, and renovate.
4. Is flexible, resourceful, and has the capacity to proactively respond to change.
5. Is full of thriving individuals with the capacity and desire to give back to their community.

Now, let's take a look at how Convoy of Hope can partner with a community to help it grow, thrive, and become more resilient.

OUR INTEGRATED APPROACH TO COMMUNITY TRANSFORMATION

AGRICULTURE

The pride and empowerment of bringing in a harvest is life-changing. That's why our agriculture specialists teach production methods that encourage long-term sustainable practices.

CHILDREN'S FEEDING

Kids are the joy of every community. By feeding kids in schools, they are getting what their brains and bodies need at a critical time in their lives. Convoy of Hope works alongside parents and leaders to identify the root causes of hunger so we can overcome the cycle of poverty together.

WOMEN'S EMPOWERMENT

Empowering women to advocate for themselves and one another breaks the cycle of poverty, creating opportunities that last for generations. We work with each woman to create a customized and holistic strategy that fits her and her family's needs.

Economic Empowerment

This training equips women to start and successfully operate their own businesses. We do this through financial education, vocational training, cooperative savings groups, and giving — not loaning — start-up capital.

Family Health Empowerment

We train women, including expectant mothers, in nutrition, health, hygiene, literacy, small-scale agriculture, and cooking. Participants often receive food to help supplement their diet and vitamins for themselves and young children not yet in school.

Girls' Empowerment

Girls in this program learn about culturally relevant issues, such as general physical health, nutrition, emotional health, self-esteem, gender-based violence, harmful cultural beliefs and practices, and feminine health and hygiene.

Agricultural Education

We engage everyone through education — from kids in school to farmers in the field — on the most effective agricultural practices for their community. We do this by facilitating after-school clubs with hands-on projects, training participants to produce and preserve food so their families have access to year-round nutrition, and engaging farmers in food production and preservation on a community or commercial scale.

Extension & Research

Through relationships with local governments, colleges, scientists, and businesses, we are conducting practical research that establishes new farming benchmarks in areas struggling with food insecurity.

Production

We are pursuing opportunities for sustainable storage, processing, and preservation methods that will promote global food security, supporting local farmers and economies.

Nutrition

Many of the children we engage with in our program receive their only meal of the day from Convoy of Hope. The urgency this reality creates is why we are committed to addressing the problems of hunger and poverty simultaneously.

Clean & Safe Water

Access to clean and safe water is a vital part of nutrition. Whether by digging a well, setting up a filtration system, or finding another method, we're committed to doing what we can to get clean water to those we serve.

Healthy Environments

We partner with communities by supporting the development of healthy environments, providing training, and evaluating infrastructure needs.

Education

We facilitate the training of children, their families, and community members in health, nutrition, hygiene, and sanitation.
